Is there a Down syndrome grandmaster ?

RobertMelo 🇩🇪

Feb 3, 2017 #1

Hey everyone i know individuals with Down syndrome are highly capable of achieving great things in the world. My question is there a grandmaster who has Down syndrome ? And if not inform me please. I'm curious about this since I'm a big fan of chess.

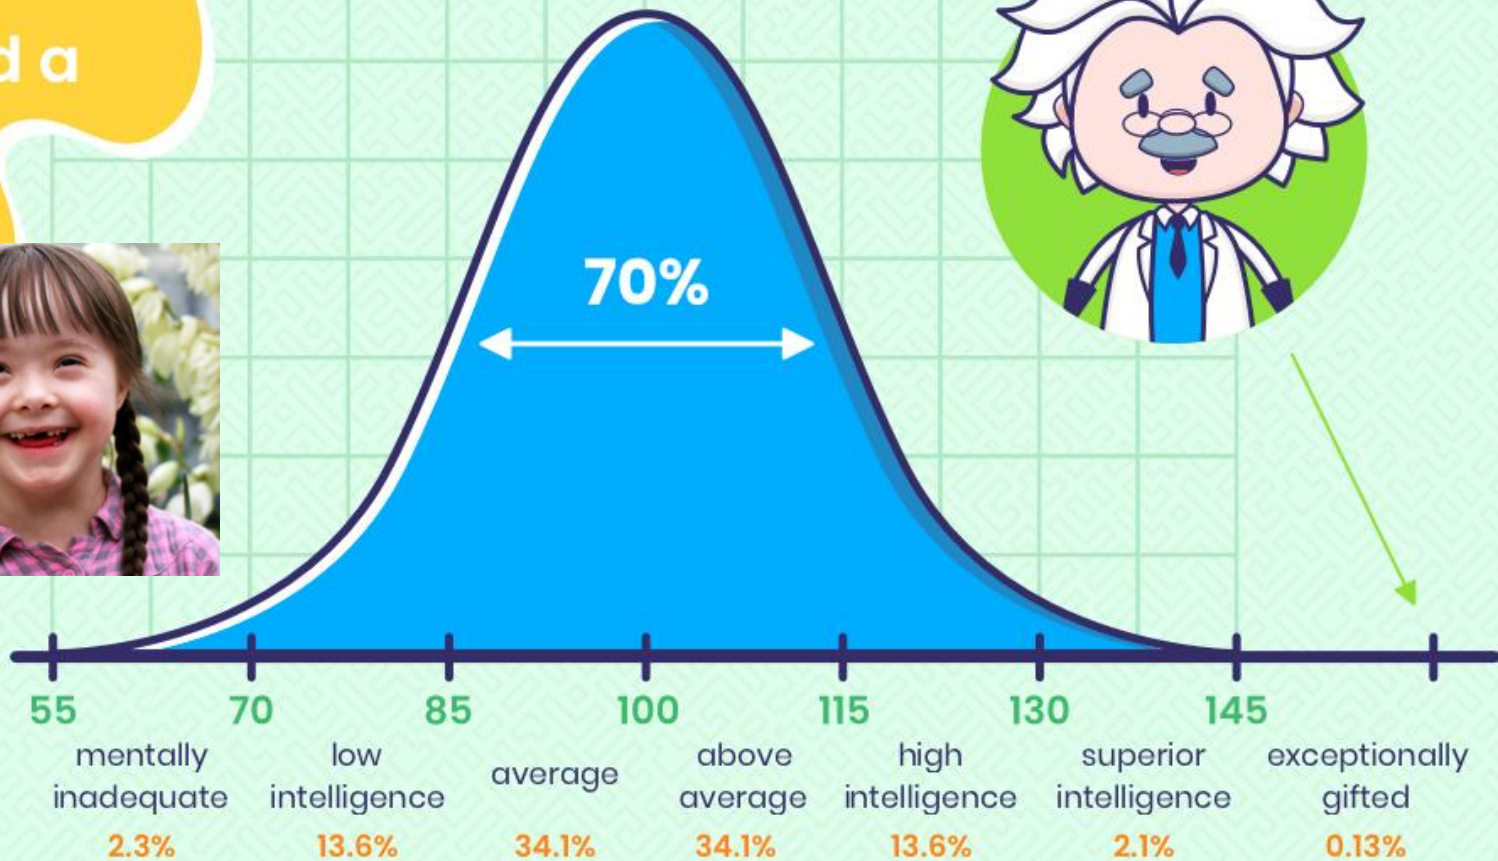

Cullister 🇨🇦 💎

Feb 6, 2017 #8

My son has Down syndrome. He's 5 and teaching him chess now. He does lots of stuff that people had previously said "no! are you kidding?" to. Maybe he won't be a GM but I teach him not to let people crap on him.

What Is Considered a High IQ?

Here is a table showing some of the top chess players in the world with a high IQ above ordinary:

CHESSE PLAYERS	IQ SCORE
Garry Kasparov	190
Magnus Carlsen	190
Bobby Fischer	187
Judit Polgar	170
Robert Bryne	170
Nigel Short	130-140

Chess for kids with Down syndrome

Wednesday, 22 July 2015 22:03

Society "Osmi Dan" from Pozarevac, Serbia, which gathers kids with Down syndrome and their parents, has decided to join forces with the local chess club "Dr Pera Mitrovic" and introduce chess to its members.

At the preliminary meeting the kids were delighted with the game, and following further consultation with "Osmi Dan" and the experts, it was agreed to start chess classes and playing sessions.

Chess coach Ivan Arsenijevic will work with a group of 14 kids aged between 3-13. Chairwoman of "Osmi Dan" Nevenka Gajic, specialist Aleksandra Petrovic and the parents will be actively involved.

There are many studies showing positive effect of chess on delaying, improving dementia/Alzheimer's. Also good results with Down Syndrome.

@Kasparov63 With Down Syndrome? I'd not heard that. Can you show us the studies?

How the cheater got caught!

Yesterday I blogged about the cheating incident that took place in the 5th round inaugural Dr Hegdewar Open Chess Tournament in Delhi. The cheater, a 19-year-old engineer from Haryana, Dhruv Kakar, rated a lowly 1517, was caught with two phones attached with tape to his body! In addition, he had a nano-microphone in one of his ears that had to be removed using a magnet. Batteries were also hidden on his person.

Chess grandmaster allegedly caught cheating on toilet during tournament

By [Sara Dorn](#)

July 13, 2019 | 3:41pm | Updated

Igor's Rausis was caught cheating on the toilet during a chess tournament.

Stockfish: 3539

Stockfish is presently the most powerful chess engine accessible to the public. It is being developed and improved by a large community of experts and genius individuals as an open-source engine. Stockfish, like many others, have used neural networks in its algorithms to enhance chess position assessment. Yes, ratings do change with time. But, Stockfish has always been that engine that has been consistently surfing over most others in the market for quite a time. The last time I checked, Stockfish was holding its ground with the usual pride and elo of 3539.

Stockfish is accessible on all major platforms, including Windows, Mac OS X, Linux, iOS, and Android. The engine, written in C++, may use 512 CPU cores. Its transposition table may be up to one Terabyte in size. The machine includes vigorous pruning and late move reductions, and an alpha-beta search.

Table of top 20 rated players of all-time, with date their best ratings were first achieved				
Rank ↕	Rating ↕	Player ↕	Date ↕	Age ↕
1	2882	Magnus Carlsen	May 2014	23 years, 5 months
2	2851	Garry Kasparov	July 1999	36 years, 2 months
