Artist Ara Ghazaryan has an exceptional eye for detail, particularly with his latest work, the world's *Smallest handmade chess set*.

Made on an incredibly minute scale, the entire board with accompanied pieces measures a total of 15.3 x 15.3 mm (0.6 in x 0.6 in), a size that amounts to be smaller than a US quarter coin.

Of the pieces, the Kings stand the tallest at 4.8 mm while the smallest pieces are the pawns, which come to 2.3 mm in height - with the chess set itself weighs 6.63 g.
